

IN THE SPECIFICATION

Applicant requests that the Examiner allow Applicant to amend existing paragraphs 15-20 of the previous specification within section "DESCRIPTION OF THE PREFERRED EMBODIMENT." New paragraphs 21 and 22 have been added as listed herein. Applicant has also assigned a number to elements not previously called-out in the prior drawings. For clarification, Applicant has added an element table as shown herein.

Applicant requests that the Examiner allow Applicant to insert the following drawing descriptions for new drawings FIG. 5 and 6 after paragraph 14 of the original specification:

FIG. 5 is a view of the wall of the collecting groove with drain ports in another embodiment.

FIG. 6 is a perspective view of the seal stator shown in FIG. 5.
